

MonaLisa Touch®: A Novel Laser Therapy for Vaginal Dryness

Patients are calling it “Life-Changing”

MonaLisa Touch delivers gentle laser energy to the vaginal wall tissue that stimulates a healing response by generating new collagen, elastin and vascularization. A typical course of treatment is three procedures over 18 weeks.

- In-office procedure
- Requires no anesthesia
- No downtime
- Minimal side effects
- Each treatment is <5 minutes
- Thousands of women have been treated worldwide since 2012

In both European and US clinical trials, women reported symptom relief after the very first treatment and even greater improvement after treatments 2 and 3.

Ask us today if the MonaLisa Touch is right for you.

For Breast Cancer survivors that are undergoing or have completed treatment, we would like to offer 3 treatments for the price of 2!

Please contact us at: 319-363-2682 to schedule an appointment and get more information or email Lesley@cr-obgyn.com
